# Research Contacts

Compiled by Global Health Union

These labs and work groups were found as potential opportunities for students to participate in research related to global health. They are not all confirmed as currently looking for new student researchers; however, we hope they will be a good resource to begin making contacts. Bulleted labs seemed particularly interesting to us, but check out the bigger links to find a wide variety of labs and groups! Know any others that should make the list? Shoot us an email at [ugaglobalhealthunion@gmail.com](mailto:ugaglobalhealthunion@gmail.com).
